

A message from a member of the TANA Executive Team...

Phyllis Cochran, Senior Vice President and General Manager,
Navistar Parts Group

"We have a number of TANA teams from the Parts Group competing this year, and I am a participant in one of those teams. I exercise daily, and I wear my pedometer to the office each day to count my steps. The average participation rate in TANA at our Parts Distribution Centers is 65 percent, and I am very proud of our team's participation and focus on health and safety. The Vital Lives Program and TANA are competitive advantages for us ... for Navistar. People are our greatest asset, and this program is about protecting our people, keeping us healthy and safe."
