

National Trends in AMI Management: Door to Drug Time with Thrombolysis

NRMI 1: Includes patients where initial ECG was the method of MI diagnosis

NRMI 2 and 3: Includes patients with ST \uparrow on 1st 12-lead ECG results, where 1st 12-lead ECG date/time = 1st 12-lead ECG with ST \uparrow and/or BBB date/time

Non-transfer-in patients
